

Adrian James Magisa

Full Stack Developer · Databases, Analytics & Cloud

Science City of Muñoz, Nueva Ecija, Philippines
ajeonicpsycho@gmail.com | 0955-402-7884

Portfolio: <https://adrianjamesmagisa.vercel.app/>

PROFESSIONAL SUMMARY

IT graduate from Central Luzon State University, based at the CLSU campus in Science City of Muñoz. I design and ship systems end to end—web applications, PostgreSQL databases, analytics dashboards, REST APIs, integrations, and AWS server operations. I have supported Department of Agriculture programs locally, built field-ready IoT and reporting tools (GROWTHetect), large-scale CRM analytics (EC ONE), production apps at CyberConnect, and monthly AWS maintenance for Saga Keiba. I document work clearly and can support deployment, troubleshooting, and user training.

WORK EXPERIENCE

Special Program for the Employment of Students (SPES)

Department of Agriculture — Science City of Muñoz | Recent

- Supported DA agricultural programs with accurate data encoding, filing, and day-to-day admin operations.
- Coordinated with supervisors and program staff on deadlines, priorities, and organized record keeping.
- Built familiarity with public-sector workflows, documentation standards, and professional communication.

Software Engineer / Full Stack Developer

CyberConnect Co., Ltd.

- Build and maintain CyberConnect: a multi-tenant, bilingual (EN/JA) workspace for requirements, screens, functions, tasks, tests, APIs, and schedules.
- DeepL API integration for automatic EN/JA translation on sheet CRUD and on Excel/CSV batch import (column mapping and conflict resolution).
- Next.js App Router, TypeScript, Tailwind, Supabase (PostgreSQL, Auth, RLS), sheet import/export, and role-based dashboards.
- Delivered AIO/LLMO Strategy OSINT Analyzer (Firebase Auth, Next.js API, Gemini, Firestore) for AI-search brand strategy reports.
- Internal tooling: CrowdWorks job scraper (Playwright) with CSV merge and Google Drive upload for team lead gen.

Software Developer / Full Stack Developer

EC ONE — Multi-channel E-commerce Platform | Professional project

- Full stack CRM: Next.js tenant UI plus customer segments, email and LINE campaigns, analytics, and delivery workflows.
- End-to-end integrations across Email, LINE, Rakuten, Meta, and marketplace/ad platforms via Supabase Edge Functions (~97 functions).
- PostgreSQL schema, RLS, cron automation, and dashboards—one of my strongest shipped systems.

Software Engineer / Full Stack Developer (AWS Operations)

Saga Keiba (OPŒÄzö™-) — sagakeiba.net

- Cloud/ops engineer for production WordPress/CMS on AWS (Tokyo): EC2, EBS, ALB, CloudWatch, AWS Backup, SNS.
- Monthly server-side backups, alarm investigation (CPU, unhealthy targets), and client-ready maintenance reporting.
- IAM coordination for least-privilege viewer access; cost and architecture documentation for stakeholders.

SELECTED PROJECTS

GROWTHetect

Software Engineer / Full Stack Developer (Capstone)

Capstone full stack build for DepEd nutrition teams: automated BMI collection via Arduino/IoT (ultrasonic height, load cell, RFID) through a local Node bridge to `/api/arduino-bridge`, with manual entry as a fallback. Growth analysis, trends, and reporting dashboards; feeding program workflows; CSV/PDF exports. Nutritionist and administrator portals on Next.js 14, Supabase, and JWT role-based access—designed and implemented end to end.

Next.js 14 · Supabase · JWT · Arduino bridge · IoT sensors · jsPDF

EC ONE

Software Developer / Full Stack Developer

B2B SaaS for Japanese and multi-channel e-commerce: unified dashboard for orders, inventory, advertising, CRM, and profit & loss. Full stack work on CRM features, Next.js product surfaces, and channel integrations (email, LINE, Rakuten, Meta) across Edge Functions and tenant RBAC.

Next.js 14 · Supabase · PostgreSQL · Edge Functions (Deno) · CRM · LINE · Rakuten · Meta · SendGrid

CyberConnect Platform

Software Engineer / Full Stack Developer @ CyberConnect

Multi-tenant project workspace for delivery teams: bilingual spreadsheet-style sheets for purpose, screens, functions, tasks, test cases, APIs, backlog, and schedule views. DeepL API fills EN/JA pairs on create/update and during Excel/CSV batch import. Team/personal workspaces, invite codes, import conflict resolution, and PM/dev/client RBAC enforced in Postgres.

Next.js 16 · React 19 · TypeScript · Tailwind · Supabase · PostgreSQL RLS · DeepL API · SheetJS

AIO/LLMO Strategy OSINT Analyzer

Software Engineer / Full Stack Developer @ CyberConnect

Full-stack OSINT-style analyzer for how brands should optimize for AI-mediated search (AIO/LLMO). Users sign in with Firebase (email or Google); the API validates tokens, scrapes official URLs, calls Gemini with a fixed consultant prompt, returns Markdown reports, and persists runs to Firestore when configured.

Next.js API · Vite · React · Firebase Auth · Firestore · Gemini · Cheerio

CrowdWorks Job Scraper

Software Engineer @ CyberConnect (internal tooling)

Playwright-based scraper for CrowdWorks development categories: extracts title, client, budget, and URL; filters by minimum fixed/hourly thresholds; deduplicates into a master CSV; writes daily snapshots; optionally uploads dated files to Google Drive for sales/recruiting workflows.

Node.js · Playwright · Google Drive API · OAuth 2.0 · CSV

Saga Keiba Web Platform (AWS Ops)

Software Engineer — operations & maintenance

Operations engagement for the official Saga Keiba site: environment assessment, monthly EBS/AWS Backup jobs, CloudWatch alarm triage, cost explanations for stakeholders, and SNS alert routing—working under constrained IAM with client admin for policy updates.

AWS EC2 · EBS · ALB · CloudWatch · AWS Backup · SNS · IAM

TECHNICAL SKILLS

Languages: Python, PHP, TypeScript, JavaScript

Frameworks: Next.js, React, Django, Laravel, React Native, Vite, Tailwind CSS

Data: PostgreSQL, MySQL, MongoDB, Firebase, Firestore, Supabase, SQL

Cloud: AWS (EC2, S3, IAM, Backup, CloudWatch, ALB), Vercel, Supabase Edge Functions

Other: Analytics & dashboards, GIS / geospatial (Bokeh), Playwright, Gemini API, REST APIs, Technical documentation, UML

EDUCATION

Central Luzon State University (2022 – 2026)

— Bachelor of Science in Information Technology (related to CS/CE)

Caanawan National Senior High School (2020 – 2022)

Also: Muñoz National High School (2015 – 2019); Licaong Elementary School (2009 – 2015)

CERTIFICATIONS

Data Visualization using Bokeh (2025)

Coursera guided project: Bokeh basics, glyphs, and geospatial mapping (completed May 2025).

Kaggle Dataset Creator (2025)

Published and shared datasets on Kaggle.

Kaggle Code Forker (2025)

Forked and extended community notebooks on Kaggle.

Kaggle Python Coder (2025)

Python notebooks and analysis on Kaggle.
